

Dependable, Honest Service since 1975 Now with locations in the Twin Cities & Mankato

LEC Recognized by Finance & Commerce as a 2019 Progress Minnesota Award Winner

CEO Matt Bergmann is pictured with the other 23 Progress Minnesota Award Winners. Matt is located in the 2nd row, 5th from the left.

Five years ago, LEC identified the skilled labor shortage hindering their workforce and business goals. The company determined that in order to continue to grow and sustain its workforce, it had to develop its own. As a merit-shop contractor, LEC decided to increase investment in its training programs and offer all new apprentices a paid 4-year apprenticeship program.

The goals of this program are significant, LEC's workforce learns to become more highly skilled than competitors, it increases employee loyalty, and organically LEC is producing 5-10 employees each year ready to pass their journeyman test. With many of the baby boomer skilled workforce exiting the industry, LEC will be able to replace them with tenured, highly skilled employees. LEC team members reap the rewards of higher pay, benefits, responsibilities and advancement opportunities.

This program has been one of the many measures that has seen LEC's workforce grow from 20 employees 6 years ago to over 110 today, making LEC one of the 10 largest electrical contractors in Minnesota.

Project Updates

The following are [projects](#) that Laketown Electric Corporation has underway. More information is available on links that are underlined.
